Thu, 20 Sep 2018 03:28:00 GMT - Organic farming is an alternative agricultural system which originated early in the 20th century in reaction to rapidly changing farming practices. Organic farming continues to be developed by various organic agriculture organizations today. It relies on fertilizers of organic origin such as compost manure, green manure, and bone meal and places emphasis on techniques such as crop rotation and ...

Fri, 21 Sep 2018 05:14:00 GMT - Organic food production is a self-regulated industry with government oversight in some countries, distinct from private gardening. Currently, the European Union, the United States, Canada, Japan, and many other countries require producers to obtain special certification based on government-defined standards in order to market food as organic within their borders.

Fri, 21 Sep 2018 13:50:00 GMT - Farmers have been spraying herbicides for a long time. In spite of that, for years organic gardeners were never really concerned about the straw being so contaminated with chemicals that it would effect our vegetable crops – possibly for years – if you used it as mulch.
